PROFESSIONAL SUMMARY & SKILLS

Dedicated and ambitious Software Engineer who constantly develops related engineering skills and competency. Possesses strong work ethics and excellent communication skills, ability to deliver superior results under extreme pressure as well as the adaptability to constantly changing circumstances. Utilizes outstanding interpersonal skills to interact effectively with cross-functional teams. Flexible and adaptable with the high level of emotional intelligence, success-oriented and valuing teamwork. Also, a true artificial intelligence enthusiast and hoping to increase know-how and skills regarding AI.

Areas of my expertise:

Programming Languages: Python, Java (SE&EE), PHP, C++,

Operating Systems: Linux (Ubuntu), Windows

Database Knowledge: PL/SQL, MySQL, Microsoft SQL Server,

Other Technologies: Unreal Engine 4 (Foundational), React Redux (Intermediate)

Markup Language: HTML5, CSS3 (Adept) JavaScript.

INTERNSHIP EXPERIENCES

Software Engineer Intern, Sovos Foriba, Istanbul, Turkey, 07.2019 – 08.2019

- Developing AI competency further by researching as well as pointing out the ways of using artificial intelligence in the company and its integration into the developed products,
- Actively working with Python for data prediction via artificial intelligence and object detection; developing a Face Detection System and helping additional task as required.

Data Science Intern, Saint-Gobain Weber, Izmir, Turkey, 07.2019 – 08.2019

- Supporting respective activities within the IT department and analyzing the data from the last 4 years through machine learning; also developing Python competency further,
- Evaluating company sales to identify the model for forecasting and creating sales estimates for the next year via machine teaching.

Intern Engineer, KKTCELL, Nicosia, Northern Cyprus, 07.2018 – 08.2018

- Supporting respective activities within the ICT Marketing Capabilities department and accountable for the control and the analysis of created packages on the database,
- Working towards to meet deadlines and defined objectives by actively collaborating with the team, developing PL/SQL competency further and learning new practices through the hands of experience.

Software Engineer Intern, Ege Soft (Ventura Yazılım ve Proje Geliştirme), Muğla, Turkey, 06.2017 – 08.2017

- Supporting respective project (Findown Automation) within the organization by detecting and fixing bugs, learning new practices through the hands of experience and coming up with new ideas,
- Developing C# competency further and working in close coordination with the team to meet deliverables.

IT Assistant, Cyprus International University, Nicosia, Northern Cyprus, 04.2017 – 10.2017

- Responsible for the repair and maintenance of devices within the university and ensuring that computer network is functioning properly,
- Helping additional duties and tasks as assigned and learning more about the Linux.

EDUCATION

CYPRUS INTERNATIONAL UNIVERSITY, Nicosia, Northern Cyprus 2016 – 2020
Bachelor's Degree: Computer Engineering
****Graduation Project: Investigating the Relationship Between Video Games, Aggression and Short Term Violent Behavior*

MUĞLA ANATOLIAN HIGH SCHOOL, Muğla, Turkey 2012 – 2016

PERSONAL DATA

Date of Birth: 03.01.1998
Place of Birth: Muğla
Marital Status: Single
Military Status: Postponed (2 years)

LANGUAGES

English: Full Professional Proficiency
German: Elementary Proficiency

PROJECTS

Face Detection Project: The project aims to understand the use of face detection libraries and enabling usage in projects.
****Technology: Python*

Atılım Educational Institutions Student Platform: The project was created to ensure online appointment towards students and also offers educational videos and following up exam results. *** *Technologies: PHP, Linux Ubuntu*

Savrano Agriculture Website: The aim of the project is to enable Savrano Agricultural customers to communicate via the web.

Findown Automation: This is an automation that records the entry and exit times, skills and competencies of the employees while salary is being calculated over hourly premium. Technologies: C#, MYSQL

TRAINING & CERTIFICATES

Oracle Beginner Certificate, Oracle Academy, 2018
****Acquired respective certificate due to the accomplishment in the Data Programming class organized by Oracle Academy.*

Why Do We Need Math, Physics and Electronics, Cyprus International University, 2018
****Participated in a seminar program regarding the importance of physics, math and electronics in engineering.*

Artificial Intelligence Seminar, Cyprus International University, 2017
****A comprehensive seminar on AI and its importance in today's world.*

Digital Life & Hacking Techniques, Cyprus International University, 2016
****Technical training about the network structure through Kali Linux platform.*

Interview and CV Preparation Techniques, Kariyer.net, 2016
****Acquired a certificate by participating in respective seminar and actively started the career planning process.*
